

**OPTIMISE  
YOUR  
INVESTMENT  
WITH NEXANS  
CONSULTING  
SERVICES**

**Our Technical Consulting services team will help you maximise your investment.**

At Nexans we know that efficient and effective cable operations are vital to the success of your projects, which is why we offer specialised engineering consulting services and installation design services for resources, renewable energy and infrastructure projects.

We have a team of Technical Consulting experts who are dedicated to helping you plan and execute your Medium Voltage Underground cable systems, so you can best optimise your investment. We will work with you to help you achieve whole of life performance targets of medium voltage cable systems. We will also help you to identify ways of reducing your installation and operating costs where possible.

We collaborate with a range of specialist termination and joint suppliers, installation contractors and consultants, to make things happen in the most efficient, cost-effective manner.

**We provide consulting for:**

- Wind farm projects
- Network infrastructure projects
- Resource Projects
- Commercial and Industrial projects
