MOBIWAY™ BOOST

RETURNABLE & REUSABLE

A win for efficiency and sustainability.

LONGER LENGTH PER DRUM WITH METRE MARKING

to minimise scrap cable & maximise usage value

SAVES TIME & COSTS

while reducing waste on every worksite.

ROBUST SPOOL SYSTEM

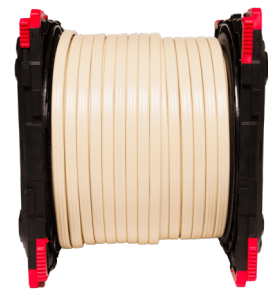

designed for ultimate safety & efficiency.

**For 40 years the spool has remained unchanged...
And so we REINVENTED THE WHEEL.**

MOBIWAY BOOST is an innovative spool system that revolutionises cable installation, elevating efficiency and safety.

Designed with the user in mind, the inner drum within the cable spool ensures a safer unspooling and rewinding process, whereas its integrated handle provides convenient and ergonomic carrying.

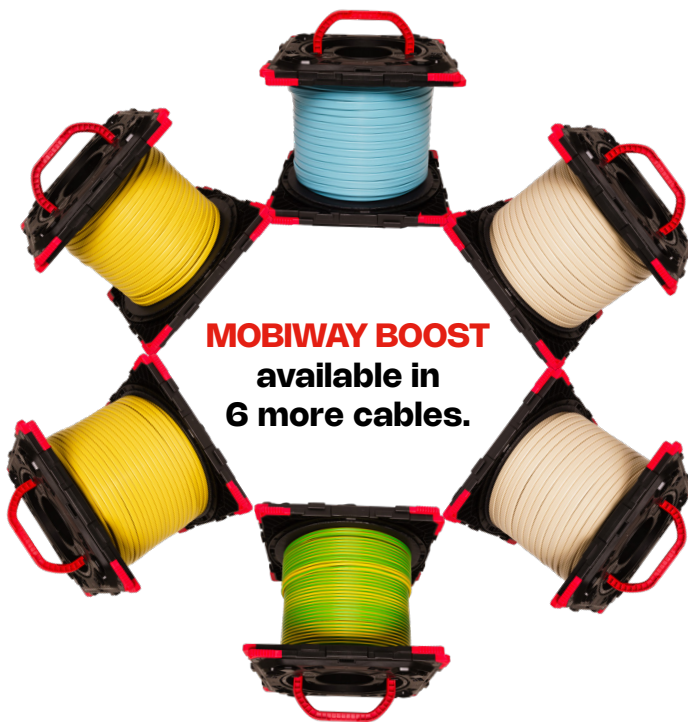

Engineered with sustainability at its core, MOBIWAY BOOST has been eco-designed to reduce its environmental footprint as it can be respooled and reused multiple times.

MOBIWAY BOOST comes with 1mm, 1.5mm & 2.5mm 2core + earth flats.

The wheel reinvented + expanded.

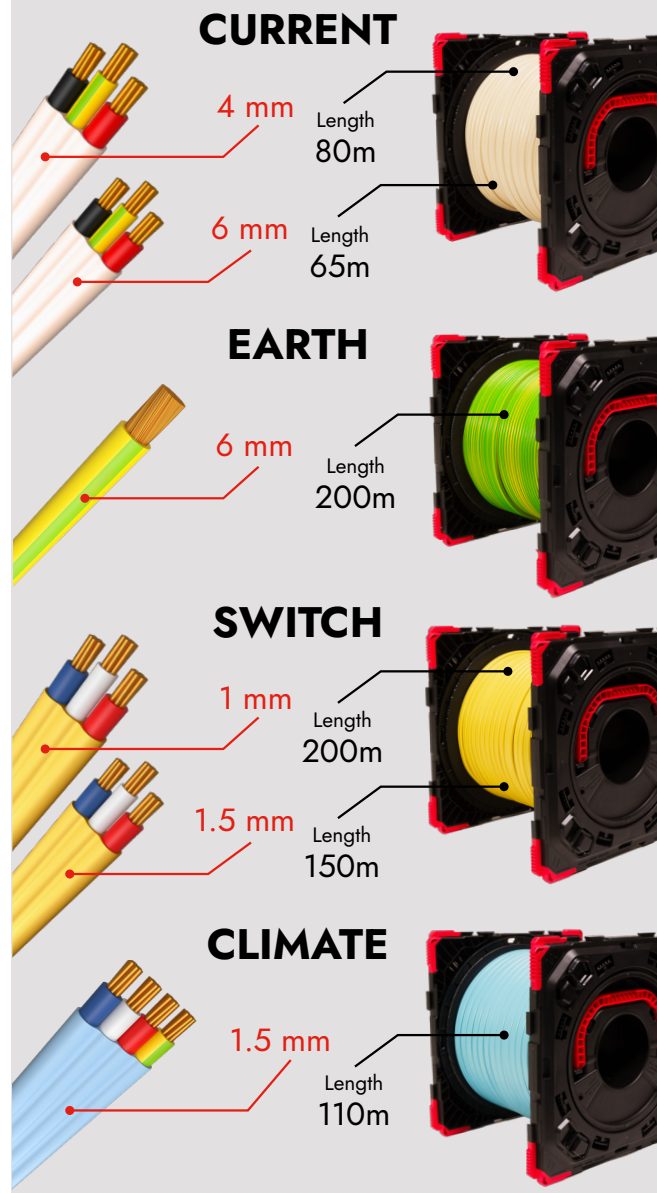

Meeting the most demanding electrical installation needs.

The MOBIWAY BOOST spool system not only features an integrated carry handle that makes transportation, rewinding, and unspooling a breeze, but it also now offers six additional cable options. The new lineup includes Earth cable in 6mm, Climate cable in 1.5mm, Switch cables in 1mm and 1.5mm, and Current cables in 4mm and 6mm—designed to meet the most demanding electrical installation needs.

Work smarter, faster, and safer. Variety matters.

The Power Of Colour **BOOSTed.**

Makes sense, whichever way you stack it.

Vertical Stacking

Horizontal Stacking

The MOBIWAY BOOST can be stacked both vertically and horizontally, reducing labor costs and improving safety and efficiency. This design allows for quick setup, secure transport, and stable storage, thanks to its rubber feet that provide added stability. The system also enables the simultaneous pulling of multiple cables.

The all-in-one spool system is specifically designed with incorporated rubber feet to prevent roll-offs during installation, ensuring stability, improving storage efficiency, and reducing the risk of spills or falls in vehicles.

MOBIWAY™ **BOOST**

The innovative cable management system that allows cable unspooling, rewinding, stacking, and carrying with ease and efficiency.
