

Nexans DRUM

BUILT FOR THE LONG RUN.

A high-strength, reusable cable drum engineered for easier transport, handling and unwinding. With up to 150 kg capacity, it simplifies installation and reduces the number of drums required on site.

COMPRESSION FLANGES.

Made from high-quality PP with compression flanges to absorb impact and protect the drum and cable during transport and handling.

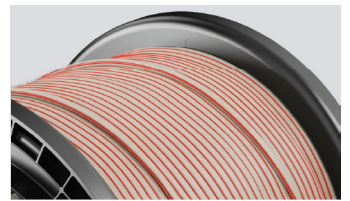

HOLDS ITS GROUND.

Integrated kick-out stability legs to prevent the drum from rolling during handling and cable installation.

STAYS TIED. STAYS TIDY.

Integrated tie-off points to prevent uncoiling during transport and storage, reducing loose cable, tangling and trip hazards.

EASIER HANDLING.

Safely carries up to 150 kg of cable, reducing the number of drums required on site, minimising waste and installation complexity.

MORE Durable

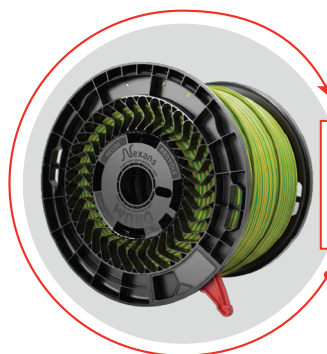

2 INTEGRATED KICK-OUT LEGS

4 INTEGRATED TIE-OFF POINTS
